

Im a over the road trucker and ive found that prior to going into one of the cities by being able to check weather and traffic now im able to take detour routes to avoid accidents and traffic backups. Most of the time when the regular radio stations get around to giving out this information its to late. This instand info is a great safety feature which benifits emergency personel myself not being tied up in traffic. Please allow xm to continue this service. Had the regular stations have done what we have ask for in the past it would have been different. Thank You
